NEWS DIGEST

Mass anti-rabies drive launched in Kodaikanal

The Kodaikanal Society for Protection and Care for Animals (KSPCA), in collaboration with Mission Rabies India, launched a large-scale free anti-rabies vaccination campaign titled 'RABIES FREE KODAI HILLS' across the hill region from May 5 to 10. The campaign was inaugurated by J Radhakrishnan, additional chief secretary and principal secretary for the civil supplies department, who administered the first dose. Using a dedicated mobile tracking app developed by World Veterinary Service (WVS), the campaign ensures accountability and effective monitoring of vaccinated animals. More than 5,000 dogs are expected to be covered. With no human rabies cases reported since 2016, Kodaikanal is close to being declared a rabies-controlled zone. Radhakrishnan highlighted the need to expand similar models to other regions.

Outpatient Cases

21 August 2025

• A young woman brought an 8-month-old dog suspected to have a front-leg fracture. Initially, the owner declined a POP bandage. X-ray was advised for confirmation.

22 August 2025

• Ms Nirmala brought a rescued cat to the KSPCA centre for dehydration. After completion of treatment, a proper diet plan for the kitten was advised.

• The same dog case from 21 August returned with X-ray confirmation of a clear forelimb fracture. A POP bandage was applied and the limb was immobilised for 30 days.

• Another dog was presented with gastric upset; treated successfully, the dog became active and alert post-therapy.

• Mr Roshan brought a cat for general check-up; the cat was healthy, and routine deworming was recommended.

23 August 2025

• A German Shepherd was presented with a complete fracture of the hind limb. Amputation was suggested but declined by the owner; the leg was treated with a normal bandage and splint. Follow-up showed good improvement.

24 August 2025

• The same cat treated for dehydration on 22 August was brought again with anorexia for two days; treated with fluid therapy and improved.

25 August 2025

• Mr Naveen brought a dog for wound dressing and suspected hind-limb fracture; treated with normal bandage.

• Mr Bala brought his 9-year-old dog for fever and limping; treated symptomatically and advised rest.

• Mr Amresh brought a cat for wound dressing; antibiotic ointment was prescribed for healing.

26 August 2025
• Early morning, Mr Shankar brought a 6-year-old female dog showing salivation and shivering, suspected snake-bite; emergency treatment was provided immediately with positive response.
• Another dog belonging to Mr Bala was presented for dressing; antibiotic ointment and povidone-iodine were advised.

27 August 2025
• Ms Vijaya Lakshmi brought a female dog for general check-up and deworming.
• Ms Subha Lakshmi brought a 3-month-old puppy for deworming; a proper diet plan was suggested

ABC SURGERIES DONE AT CENTRE BY DR MALLESWARA RAO

Dog Bite & Rabies Incident Reports – August 2025

3 August 2025 – Confirmed Rabies Case at Vilpatti
• Location: Vilpatti, Kodaikanal
• Incident: A privately owned dog began showing signs of aggression, hypersalivation, and disorientation.
• Reported by: Owner to the KSPCA field team.
• Action: The KSPCA team, led by the Education and Surveillance Officers, immediately visited the site and advised the owners to securely confine the dog and avoid physical contact.
• Outcome: The dog died the following day (4 August 2025). A post-mortem examination was conducted, and the sample tested rabies positive.
• Follow-up: The owner's family and all exposed individuals were advised and assisted in completing full Post-Exposure Prophylaxis (PEP) at the Government Hospital.
• Additional Action: The KSPCA Mission Rabies team carried out ring vaccination of dogs in the surrounding Vilpatti area to prevent further spread. Awareness and surveillance were also reinforced in adjacent streets.

Remarks:
This case highlights the importance of timely isolation and preventive vaccination. The swift response by the KSPCA and the ring vaccination drive ensured no secondary cases were reported in the following weeks.

Dog Bite Surveillance Report

9th August 2025 – Chellapuram, Fairy Falls Road, Kodaikanal

Nature of Complaint:
Aggressive dog behavior reported by multiple residents in the Chellapuram area. A pack of six free-roaming dogs was observed displaying territorial aggression and reportedly attacked and killed a calf.

Findings:
• The dogs in the area were verified as **owned, free-roaming community dogs** belonging to local residents.
• All six dogs had been **vaccinated during the May 2025 Anti-Rabies Campaign**.
• No new bite incidents involving humans were reported at the time of inspection.
• Community members confirmed previous education on **responsible ownership and feeding control** had been conducted.

Action Taken:
• Surveillance team conducted **site inspection and behavior monitoring** of the pack.
• Local owners were advised to **restrict free roaming** and monitor aggression, especially around livestock.
• Nearby residents were reassured that **all animals are vaccinated**, reducing rabies risk.
• Follow-up community education scheduled for the next week to reinforce **responsible ownership and waste management**.

Status:
Under continued surveillance. No further incidents reported as of the last review.

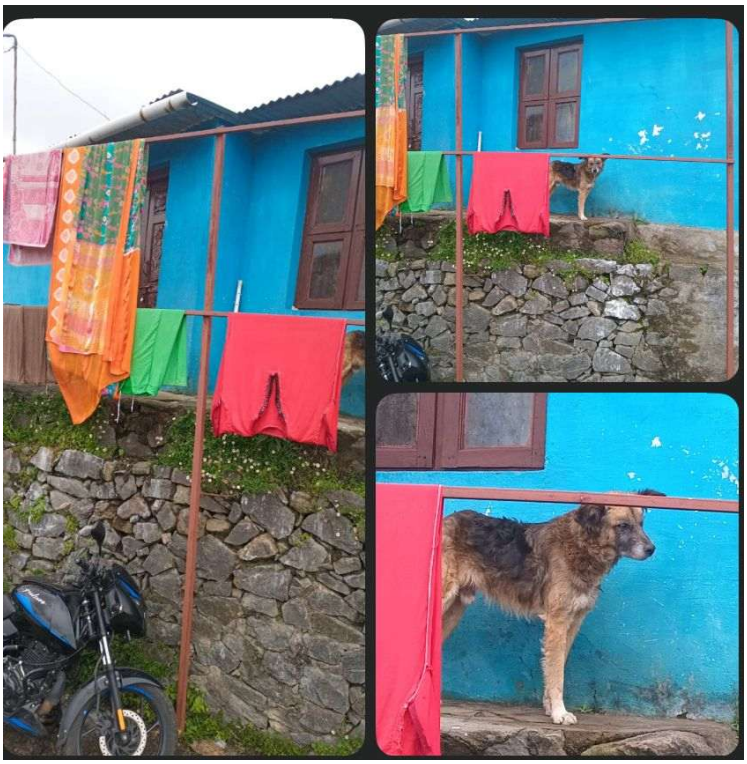

11th August 2025 – Vatakanal Road

Nature of Complaint:
Aggressive dog complaint received from residents of **Vatakanal Road**. The dog was reported to be chasing pedestrians and showing territorial behavior.

Findings:
• The dog involved was identified as an **owned pet**, regularly allowed to roam freely in the area.
• No human bite incidents were reported.
• The animal had been **vaccinated during the May 2025 Anti-Rabies Campaign**.

Action Taken:
• The owner was **counselled on responsible pet management** and agreed to keep the dog confined within the premises to avoid further incidents.
• Neighbours were reassured of ongoing **surveillance and vaccination coverage** in the locality.
• The area will remain under **periodic observation** by the KSPCA surveillance team.

Status:
Resolved — dog confined by owner; no further complaints reported.

22nd August 2025 – Fairy Falls Road (Near St. Peter's School)

Nature of Complaint:
Dog bite complaint received from residents near **St. Peter's School, Fairy Falls Road**.

Findings:
• On arrival, the KSPCA team observed that the dog was a **lactating mother** with puppies, showing **defensive behavior** when people approached the nest area.
• The dog was confirmed to be **owned and regularly fed** by a local resident.
• No signs of rabies were observed. The behavior was identified as **maternal guarding**, not aggression.

Action Taken:
• The team **educated residents** on dog behavior during nursing periods and advised them to **avoid disturbing the mother and puppies**.
• Owner was advised to provide **safe confinement** for the dog and monitor interactions with passersby.
• The area was marked for **follow-up under the ABC–ARV programme** once the puppies are weaned.

Status:
Case stable — dog under observation; no further aggression reported.

Summary of Surveillance Actions – August 2025

• Total Complaints Received: 3
• Human Bite Victims: None confirmed
• Animal Victims: 1 (livestock death – calf)
• Dogs Monitored for Rabies: 7
• Dogs Vaccinated / Verified: 7
• Hotspots Under Surveillance: Chellapuram, Fairy Falls Road, Vatakanal

---

Remarks & Recommendations

• Most aggression cases were linked to owned dogs allowed to roam freely.
• Maternal guarding and food-based aggression remain common behavioral triggers.
• Strengthen owner education on responsible pet confinement and waste management.
• Continue weekly surveillance of Chellapuram and Fairy Falls Road areas for follow-up observation.

Adoptions and Fostering

• Stella – 2-month-old female puppy, rescued by Billy Kohlatkar, fostered at KSPCA foster home adopted by Mr. Yesuraj on 20 August. Dewormed, vaccinated, healthy.
• Patches – 2-month-old female puppy, rescued by Billy Kohlatkar, fostered at KSPCA foster home adopted by Mr. Yesuraj on 20 August. Dewormed, vaccinated, healthy.

• 6 Puppies (5M + 1F) – 1-month-old litter fostered at KSPCA, adopted by Mr. Johnson of Kookal on 24 August. Rescued, vaccinated, and rehomed locally.

• Layla – 1.5-year-old black female dog, neutered; adopted by Mr. Eswaran Gundapati on 24 August.

• Maya – 2-year-old female dog, neutered; adopted by a local family in Naidupuram on 28 August after rehabilitation.

• Dumped Puppies (27 August) – 10 pups were found abandoned outside the KSPCA centre. FOUR were adopted the next day; seven remain under foster care at the KSPCA facility.

• Dumped Puppies (30 August) – Two additional pups were found near the centre gate and taken into foster care.

Media & Outreach

KSPCA featured in *The Hindu* – August 31, 2025

Kodaikanal's effective animal welfare initiatives received national attention when *The Hindu* featured KSPCA's work on 31 August 2025 in an article titled *"Kodaikanal shows the way in containing the stray dog menace."*

The article highlighted:
• Kodaikanal's record of zero human rabies deaths in the past seven years.
• The partnership between KSPCA and Kodaikanal Municipality in implementing the Animal Birth Control (ABC) and Anti-Rabies Vaccination (ARV) programmes since 2017.
• Continuous community sensitisation and follow-up for dog-bite victims undertaken by KSPCA's education and surveillance team.
• The role of public participation and government collaboration in achieving long-term stray dog management in the hill town.
• Remarks from KSPCA's Managing Trustee, Janani Krishnamurthy, on the importance of sustained, community-led animal welfare action.

The coverage recognised Kodaikanal as a model for humane and effective street dog management in Tamil Nadu, showcasing the combined efforts of the KSPCA team.

Kodaikanal shows the way in containing the stray dog menace

SEPTEMBER 2025

Total number of outpatient cases attended: 68

• Medicine cases: 43
• Surgery cases: 23
• Gynaecology cases: 2

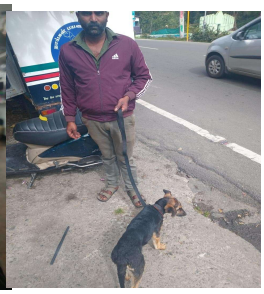

Total rescue cases: 20

Medical & Critical OPD Cases

2nd September

• *Ascites Case:* A 4-year-old male dog brought by **Santhiya** was treated for **severe abdominal fluid accumulation (ascites)**. Fluid was aspirated and supportive treatment provided.
• *Cat Bite Case:* **Rohit** brought his cat bitten by another cat; **Anti-Rabies Vaccine** was administered.

3rd–8th September – Parvovirus Outbreak

• **Mr. Karthik's dogs** (Dora and another pup) were treated for **parvovirus infection** with fluid therapy and daily follow-ups for five days. Both dogs recovered completely by 8th September.

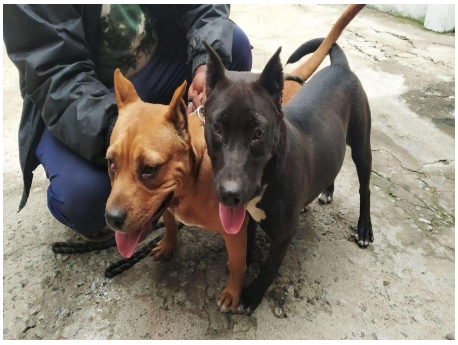

6th September

• *Vomiting Case (Pitbull):* **Mr. Naveen's** dog "Killer" treated for vomiting; sibling "Ansy" vaccinated.

• *Follow-up Parvo Case:* Continued treatment for Karthik's second dog infected through contact.

• *Wound and Pain Treatment:* **Miss Sasikala** brought her pet for **ARV and pain management**.

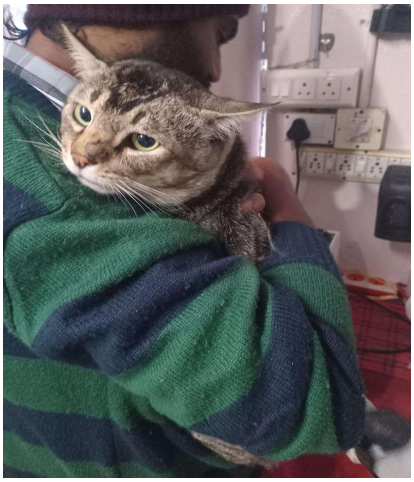

8th September

• *Gynaecology Case:* **Miss Lakshmi's** 4½-year-old female dog presented with **pus discharge from vagina (pyometra)**; treated and monitored.

• *Skin Case:* **Leo**, 3½-year-old male dog, treated for **skin patches and wounds**.

• *Wound Cleaning (Cat):* **Mr. Hasim's** 5-year-old cat received wound care and dressing.

11th–12th September

• *Feline Anorexia Case:* **Miss Binu's** 45-day-old kitten treated for **anorexia and weakness**, followed by 2nd day review on 12th September.

15th September

• *Skin Case:* **Harhi**, 5-year-old male dog owned by **Mr. Jai Kumar**, treated for **skin infection**.

16th September

• *Puppy Vomiting Case:* **Miss Anusiya's** one-month-old puppy treated for **vomiting**; recovered post-treatment.

• *Cat Nasal Bleeding Case:* **Rohit's** cat treated for **nasal bleeding**.

• *Feline Anorexia Case:* **Jaisiya's** 5-year-old cat treated for anorexia.

17th September

• *Limb Pain Case:* **Mr. Bala's** dog treated for **limb pain and swelling**.

18th–19th September – Liver Failure Case

• **Miss Narayani's male Labrador** diagnosed with **complete liver failure** after blood tests. Intensive treatment and follow-up continued for 2 days.

20th September – Community dogs Treatment

• **Mr. Chelladurai** brought **two dogs** suffering from **parvovirus and wounds**. Treated as **rescue medical cases** and stabilized.

27th September – Home Visit (Follow-up)

• A **house visit** was made to **Ms. Naveena's residence** for **suture** and wound inspection.

30th September

• *Bloating Case:* "**Waffle**", 4-year-old male dog belonging to **Miss Renu**, treated for **chronic bloating for 10 days**.

• *Limb Pain Case:* **Mr. Bala's dog "Jacky"** treated for **limb weakness and pain**.

Field Rescues and Outreach

20th September – Snake Bite Management & Handling Workshop

A **Snake Bite Management and Snake Handling Training & Capacity Building Workshop** was conducted for the **Kodaikanal Forest Department**, organized by the **KSPCA team**.
The session was **led by Miss Janani Krishnamurthy (KSPCA)** and **Mr. Sadiq (Wildlife and Nature Conservation Trust – WNCT)**.
The training covered **safe snake rescue techniques**, **identification of local venomous species**, and **first aid management for snake bites**.
This programme enhanced the response capacity of the forest field staff for safe handling and mitigation of human–snake conflict situations.

23rd–25th September – Equine Welfare Camp (WVS Ooty Collaboration)

A **three-day Equine Welfare and Veterinary Camp** was conducted in collaboration with the **WVS Ooty team**, focusing on deworming, vaccination, and welfare education for working equines in Kodaikanal and nearby villages.

Camp Schedule and Coverage:

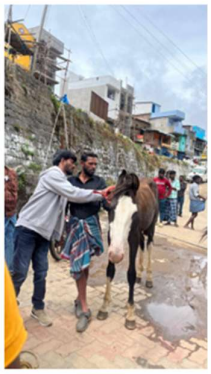

23rd September: Poombarai and Mannavanur

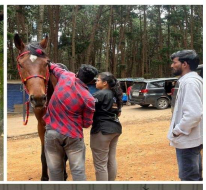

24th September: Machur and Pannaikadu

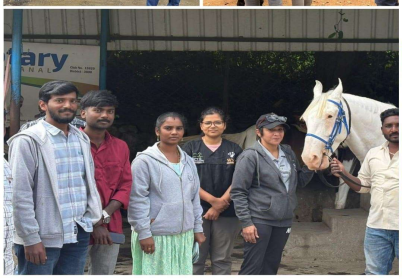

25th September: Lake Road, Golf Club, and Guna Caves

A **total of 99 equines** were **dewormed and vaccinated** during the camp.
The sessions also included **awareness on proper nutrition, hoof care, and load management** for owners and handlers.

11th September – Mannavanur Rescue Case

The **KSPCA field team** attended a **critical rescue case at Mannavanur**, where an abandoned **dog was found with a metal chain deeply embedded around its neck**.
The team **removed the chain on-site**, provided **spot treatment and wound management**, and administered **Anti-Rabies Vaccination (ARV)**.

<u>3rd September – Bazar Road Tumour Rescue</u>

• Ms. Esther informed the KSPCA team about a stray dog on Bazar Road suffering from a large visible mammary tumour.
• The KSPCA rescue team responded the same day and brought the dog to the centre.
• After evaluation, Dr. Malleswarao performed a successful tumour removal surgery.
• The dog was given full post-operative care, antibiotics, and nutritional support, and remained under recovery at the KSPCA shelter until completely healed.
(This case was part of the 10 surgeries completed in September and classified as a major rescue surgery.)

Other rescue cases images :

Adoptions and Fostering

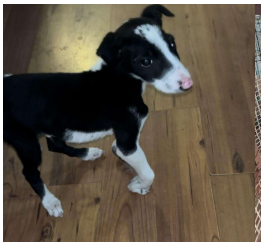

• **Black Pup** – 2-month-old male puppy rescued and fostered at the KSPCA foster home; **adopted by a local family in Kodaikanal** on 1 September. Healthy, dewormed, and vaccinated.The other pups were also adopted in next few days.

• **Kayal** – 2-month-old female puppy, rescued and brought into the **KSPCA Centre** for treatment; now **under foster care** with the KSPCA team. Fully vaccinated and dewormed.

• **Frodo** – 2-month-old male puppy **brought in on 9 September**, under **KSPCA foster care**. Fully vaccinated, dewormed, and in good health.

Total Animals Adopted: 7
Total Under Foster Care: 7 (2 at KSPCA Centre)

• Children Educated: 250
• Education Officers: Janani / Tamil/ Saffi

World Rabies Day 2025 – Kodaikanal Hills

Theme: "Act Now – You, Me and Community"

World Rabies Day 2025 marked a decade of dedicated efforts by KSPCA to create a rabies-controlled Kodaikanal. Ten years ago, the Rabies-Free Kodaikanal Initiative was launched in collaboration with the Dindigul District Administration, Kodaikanal Wildlife Sanctuary, Kodaikanal Municipality, Panchayats, Animal Husbandry Department, schools, and local NGOs. Today, Kodaikanal stands as a rabies-controlled zone with no human rabies cases for the past 7 years.

Vaccination and Awareness Activities

In 2024, KSPCA, in collaboration with Mission Rabies, vaccinated 3,751 dogs across 92 villages.

In May 2025 alone, 4,196 dogs were vaccinated across the Kodaikanal Hills.

The Education Team conducted awareness sessions in schools and communities.

The Surveillance Team monitored dog-bite cases through IBCM (Integrated Bite Case Management) to ensure timely response.

With a population of just over 1 lakh, Kodaikanal has become the second rabies-controlled zone in India after Goa, illustrating the impact of sustained community involvement.

World Rabies Day Rally

The rally started from Municipal Office Children's Park and proceeded to Bendifield, Kodaikanal International School campus, inaugurated by District Collector Thiru. S. Saravanan, IAS. Key dignitaries included the RDO, BDO, DSP Selvi Uva Priya, Panchayat officers, Urban PHC doctors, Animal Husbandry officials, and Kodaikanal Municipality officials.

Participation: 350 individuals, including school children, NGOs, and community members. A speaker on the microphone guided the rally, and children enthusiastically shouted slogans such as:

"Rabies Down Down"

"Rabies-Free Kodai"

"Rabies-Free India"

Highlights:

Children wore animal masks to symbolize human–animal bonds.

Placards in Tamil and English conveyed messages on rabies awareness and responsible pet ownership.

Horse Owners Association participated with their horses.

KSPCA's mascot dog, Poppy, walked with the rally; children petted her and learned to overcome fear of street dogs while understanding compassion for animals.

Participating Schools and Organizations:

Government School – 150 students

KPS School – 25 students

Brindavan School – 25 students

PCK School – 50 students

NGOs such as Smile and others

Kodaikanal International School – poster & placard contributions; support at Bendifield

St. Peter's School – school bus support

KSPCA–Mission Rabies Team:

Founder & Managing Trustee: Janani Krishnamurthy

Committee Member: Naveena

Education & Surveillance Officers: Saffi & Tamil

Veterinary Team: Dr. Ramana & Dr. Malleswara Rao

Handlers & Veterinary Assistants: Raji, Ajay & Johnny

Conclusion

The rally reinforced that achieving zero rabies by 2030 is possible only through collective responsibility and community participation. With ongoing vaccination, education, and surveillance, KSPCA, MISSION RABIES and the people of Kodaikanal continue to move towards a Rabies-Free Future.

Community Education Totals:

Total Adults Educated: 406

Total Children Educated: 258

OVERALL TOTAL-(school+community)

Total number of adults educated : 416

Total number of children educated: 418

Summary & Observations

1. Key Findings:

• September recorded strong participation across schools, public areas, and special events, especially during World Rabies Day.
• Joint sessions with the District Forest Department and Horse Owners' groups improved reach among working animal handlers.
• The inclusion of children's rallies and interactive education methods (mask-making, slogans) enhanced public interest and awareness.
• The community showed high responsiveness to rabies prevention messages, with several local residents volunteering to assist in future drives.

2. Challenges Faced:

• Weather interruptions and hilly terrain caused minor rescheduling of outreach events.
• Some government schools were unavailable due to examinations.
• Certain areas (Kalaraimedu, Prakashapuram) had lower turnout initially due to scattered population.
• Need for additional educational materials (Tamil-language posters and visual aids) during outdoor sessions.

3. Recommendations for Next Month:

• Conduct follow-up sessions in hotspot areas to reinforce rabies awareness.
• Extend school outreach to at least three additional schools, including Tamil-medium institutions.
• Introduce interactive demonstrations on animal handling and dog-bite prevention for children.
• Coordinate with local PHC and other NGO teams for joint awareness-cum-vaccination programs.
• Begin planning for year-end Rabies-Free Kodaikanal review and evaluation activities.

Media & Outreach Coverage

The **World Rabies Day Rally 2025** received extensive coverage across major **Tamil newspapers and local media channels**, highlighting the collaborative efforts of KSPCA, Mission Rabies, and the District Administration.

• Leading Tamil dailies including **Dinamalar**, **Dinakaran**, and **Malai Murasu** featured detailed reports and photographs of the rally, emphasizing community participation and the goal of a **Rabies-Free Kodaikanal**.
• The articles showcased **District Collector Thiru. S. Saravanan, IAS** flagging off the rally, along with key dignitaries, KSPCA officials, Mission Rabies staff, and student participants.
• **Regional TV channels** and **digital news outlets** also broadcasted visuals from the event, reinforcing the message of responsible pet ownership and vaccination awareness.
• Photographs of school students, KSPCA's mascot **Poppy**, and the **horse owners' participation** were widely shared on **local WhatsApp, Facebook, and Instagram groups**, amplifying public reach.
• The attached clipping (example: *Dinakaran – Dindigul District Edition*) captured the spirit of the event and community involvement across Kodaikanal.

Dog Bite Incident & Surveillance Report

1st & 2nd September – Netaji Nagar (M.M. Street Side)

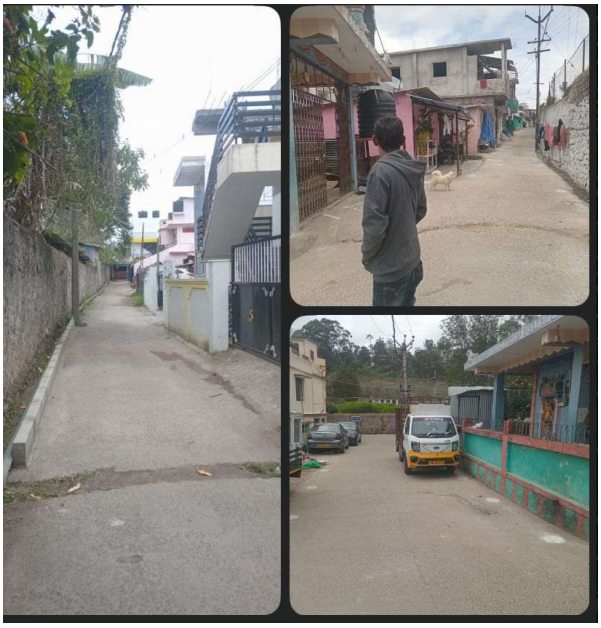

Residents reported incidents of **dogs chasing children** and **minor bite scares** in the area.

Findings:
No dogs were found on arrival; they were likely hiding due to disturbance and crowding after the complaint.
The dogs in this locality had been **previously vaccinated during the May 2025 Anti-Rabies Campaign**.

Action Taken:
Residents were **educated on dog behavior**, safe interaction, and the **humane approach to catching, neutering, and vaccinating** community dogs.
They requested that future interventions be done **humanely through the ABC–ARV programme**.

Status:
No dogs sighted during inspection; community educated.
Area scheduled for **follow-up monitoring**.

Officers: Saffi

6th September – Bliss Villa Area, Noyce Road

Complaint received regarding a **pack of dogs attacking and killing a goat**.

Findings:
One identified dog was caught the following day; **no signs of rabies** observed during monitoring.

Action Taken:
The dog underwent **ABC–ARV** at the KSPCA Centre and was released post-recovery.

Status:
Case resolved.

Officers: Tamil / Saffi

13th September – Pachamarathodu Area (Councillor Complaint)

Complaint from local councillor regarding **seven owned, free-roaming dogs attacking residents**.

Findings:
Owner unavailable during inspection; residents confirmed dogs roam freely and display aggression.

Action Taken:
Follow-up planned to **meet the owner and bring all dogs for ABC–ARV**.

Status:
Follow-up pending.

Officers: Tamil / Saffi

16th September – Anandagiri 2nd Street

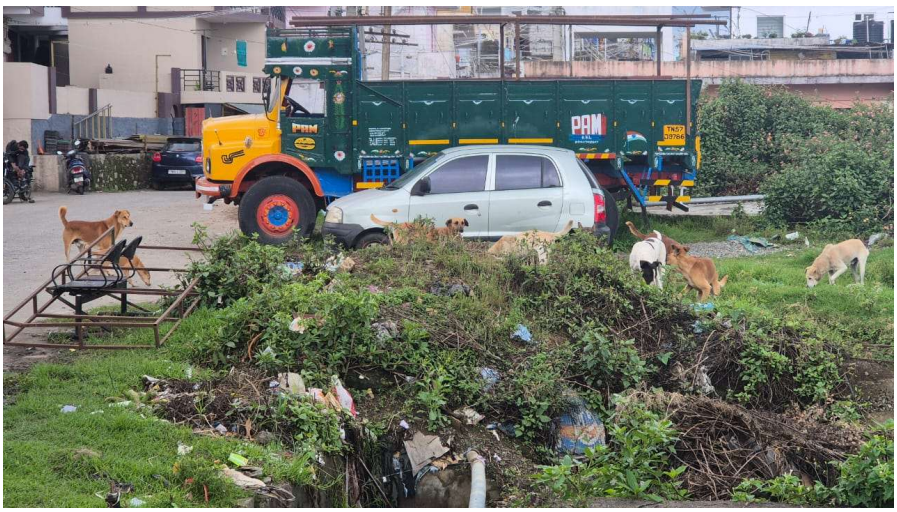

Complaint about **dog menace near a garbage dump**.

Findings:
Dogs frequenting the area due to **food waste accumulation**; most already neutered and non-aggressive.

Action Taken:
Residents educated on **garbage management and responsible feeding** to deter scavenging behavior.

Status:
Area stable; dogs monitored.

Officers: Tamil

22nd September – Lake Area (Tourist Zone)

Complaint received about a **black-and-tan dog chasing tourists**.

Findings:
Dog was **friendly and wearing a collar**; identified as semi-owned by a local vendor.

Action Taken:
Taken to KSPCA Centre, monitored for 48 hours, showed **no rabies symptoms**, underwent **ABC–ARV**, and was released back to location.

Status:
Resolved.

Officers: Tamil

27th–30th September – Chettiar Park, M.M. Street & Adjoining Areas

Multiple complaints of **dog bites and aggressive packs** reported between 27–30 September.

Victims:
• 27 Sept – Saraswathi
• 27 Sept – Karupan
• 27 Sept – Karupaiya
• 28 Sept – Stella
• 28 Sept – Dev Ray
• 30 Sept – Gangadharan
• 30 Sept – Pradeep

Findings:
Reports indicate attacks by a **pack of approximately 10 free-roaming dogs** frequenting Chettiar Park and nearby lanes.

Action Taken:
• Victims advised on **PEP (Post-Exposure Prophylaxis)** and referred to PHC.
• KSPCA field team deployed to **locate and monitor** the dogs.
• Dogs identified for **capture, monitoring, and ABC–ARV** under Mission Rabies program.

Status:
Active monitoring ongoing.

Incident Report – Dog Bite Cases near Chettiar Park, M.M. Street

Location: Chettiar Park, M.M. Street, near Infant Jesus School entrance and opposite a restaurant, Kurinji Temple Road, Building Society

Details of Incidents:
• Residents and victims reported a **pack of four dogs** (one brown, two white, one black) attacking people.
• On **27th September**, KSPCA team visited the site and confirmed the dogs' aggressive behavior.
• On **28th September**, inspection revealed the dogs **guarding raw meat and rice** dumped on the roadside, leading to territorial aggression.
• Area terrain—**dense bushes, uneven ground, and multiple escape routes**—made capture difficult.
• Initial **catching attempts failed** as dogs fled into nearby schools and lanes.

KSPCA Surveillance & Follow-up:
• Surveillance team met all bite victims and recorded statements.
• Team will ensure victims complete PEP as per protocol.

Feeding Issue Identified:
• Residents complained that **Ms. Madhu (local lawyer)** feeds raw meat and rice daily at multiple locations without supervision.
• Food remnants attract and trigger **territorial aggression** among the dogs.
• Ms. Madhu has been **uncooperative** with KSPCA teams attempting humane capture.

Legal & Welfare Concerns:
As per Supreme Court & AWBI feeding guidelines:
• Dogs must be fed only in designated feeding areas.
• Raw meat feeding is prohibited; only cooked, safe food should be provided.
• Leftovers must be cleared immediately.
• Feeders are responsible for vaccination and sterilization of the dogs they feed.

Observations:
• Guidelines were not followed in this case.
• Improper feeding led to **food-guarding behavior** and aggression.

Action Planned by KSPCA:
• On **29th September (6:30–7:00 AM)**, team scheduled to **catch identified dogs** for **ABC–ARV**.
• After sterilization and recovery, dogs will be **released back** to their territory.
• Permanent monitoring to continue by KSPCA surveillance team.

Community Demand:
• Residents request **action against Ms. Madhu** for irresponsible feeding.
• Alternatively, she must cooperate with KSPCA, maintain feeding hygiene, and ensure vaccination and sterilization of the dogs.

Follow-up:
• KSPCA to **monitor area continuously** and work with local authorities for resolution.
• **Irresponsible feeding** identified as the root cause of repeated aggression and attacks.

Status:
Under observation – dogs scheduled for ABC–ARV; public awareness and feeder regulation measures ongoing.

Officers: Tamil

29th September – Vilpatti Pirivu Area

Complaint received of a **dog bite incident** involving one victim named **Antony**.

Findings:
The area is semi-rural with scattered housing; one stray dog was reported aggressive and had bitten the complainant while defending food scraps.

Action Taken:
• The victim was referred for **PEP** immediately.
• Area inspected; dog not sighted during visit.
• Local residents educated on **humane reporting and safe feeding practices**.
• Dogs in the surrounding zone to be verified during the next **ARV–ABC round**.

Status:
Follow-up scheduled for re-inspection.

Officers: Tamil

Summary of Surveillance Actions – September 2025

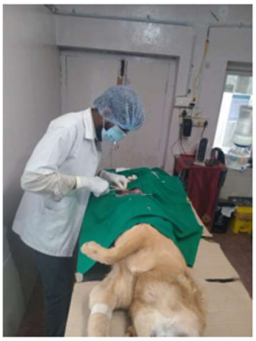

• **Total Complaints Received:** 9 (including major Chettiar Park cluster)
• **Total Bite Victims Reported:** 8 confirmed human cases, 1 livestock death
• **Dogs Captured & Treated (ABC–ARV):** 10

• **Dogs Monitored for Rabies:** 10 (none rabid)
• **Key Hotspots Under Surveillance:** Netaji Nagar (M.M. Street side), Chettiar Park, Kurinji Temple Road, Noyce Road, Pachamarathodu, Anandagiri, Vilpatti Pirivu

Remarks & Recommendations

• Irresponsible feeding and poor garbage management continue to be major contributing factors for dog congregation and aggression in public spaces.
• Need for stricter enforcement of waste management and feeder responsibility guidelines.
• Educational reinforcement required for residents and feeders on humane coexistence and legal obligations.
• All bite victims must complete PEP course as verified and kspca team will follow up with them.
• Increase coordination with the Municipality and kspca team for sustained ABC–ARV coverage, particularly in the Chettiar Park zone.
• KSPCA to conduct joint inspections with local authorities to address garbage dumping near residential areas and schools.

• Gynaecology cases: 0

Total rescue cases: 25

MM Street Dog Camp – October 2025

The MM Street Dog Camp continued during October. Follow-up of bite cases was carried out and dogs involved in bite incidents were caught and brought in for sterilization.

1.Rescue at Kallukuzhi

KSPCA received a call regarding a dog with a plastic container stuck on its head. The dog was rescued and brought to the center and was given the required treatment.

2.Max

Max, a black abandoned street dog, was brought into the center for treatment and supportive care. He remains under the care of KSPCA and is being provided comfort and supportive treatment in his final days.

3.Mannar – Working Horse

On 17.10.2025 a working horse named Mannar with severe injuries was referred and transported to BMAD, Chennai, for advanced treatment. Despite all efforts and treatment provided, Mannar succumbed to his injuries.

Equine Camp – Palani (14 October 2025)

In continuation of the bi-annual equine camp conducted in September, an equine welfare camp was organized on 14 October 2025 in collaboration with WVS Ooty, Palani Municipality and the Department of Animal Husbandry. The camp covered the Palani area and a total of 97 working equines were vaccinated, dewormed and underwent health checks. The Education Team also conducted awareness sessions on rabies, equine welfare and general animal welfare for owners and the public.

Total rescue cases: 8

RESCUE & SPOT TREATMENT CASES

14 November 2025 – Dermatitis Rescue

History: Animal had severe dermatitis for the past one month.

Treatment: Treated with Inj. Ivermectin and Tab. Ivermectin was prescribed for follow-up treatment.

21 November 2025 – Rescue at Pamparpuram

Condition: Suspected bilateral hip dislocation.

Treatment: Spot treatment with Inj. Tramadol administered and follow-up advised.

21 November 2025 – Rescue at Church Road

Reported by: Mr. Samuel

Condition: Wound injury.

Treatment: Under premedication with xylazine, the wound was cleaned and bandaged. Inj. Ceftriaxone and Inj. Tramadol were administered.

21 November 2025 – Rescue at Gandhi Road

Condition: Animal was found drowned in a drainage.

Treatment: Hot fomentation along with Inj. Prednisolone and Inj. Frusemide was given as emergency spot treatment.

23 November 2025 – Automobile Accident Case

History: Animal had a history of automobile accident.

Treatment: Antibiotics, analgesics, and mannitol were administered.

Outcome: Animal recovered and was returned back to its original location.

25 November 2025 – Rescue at Observatory

Condition: History of automobile accident with hindlimb paralysis.

Diagnosis: Fracture of sacrum.

Treatment: Spot treatment with Inj. Prednisolone and analgesics was administered.

November 2025 – Rescue at Lake Road -Condition: Animal abandoned by owner. Treatment: Animal was rescued and treated at the KSPCA centre for dermatitis.

<u>28 November 2025 – Rescue at Kodaikanal Christian College</u>

Details: Four pups (3 male and 1 female) were rescued.

Treatment: Deworming and Anti-Rabies Vaccination administered.

Outcome: All pups were successfully adopted.

ADOPTIONS & FOSTERING AT KSPCA

Special Story – Max

Many did not know his story. Max was an abandoned dog who became part of the Kodaikanal community. Tall, handsome and unforgettable, he remained near the place where he had once been left behind. By 2017 he was already around four years old and well known around KIS Lake and Seven Roads. KSPCA brought him in during 2017 for neutering and vaccination and attempted rehoming, but Max always returned to the place he considered home. While KSPCA called him Max, local taxi drivers affectionately called him **Karuva**.

In 2024 he was treated for skin disease. In 2025 he returned for tumour removal. Each time he insisted on going back to his familiar people and streets.

In his final month, Max came to the centre unable to move. This time he stayed, resting peacefully and receiving warmth, food and affection from the KSPCA team.

Max passed away peacefully during 25 th November 2025.

Please do not abandon animals after adopting them.
Adopt, Don't Shop.

FEBRUARY 2026

Total number of outpatient cases attended: 53

• Medicine cases: 43

• Surgery cases: 7

• Gynaecology cases: 3

Total rescue cases: 27

February saw outpatient cases from various parts of the Kodaikanal Hills. KSPCA continued its field Anti-Rabies Vaccination (ARV) programme in identified hotspot areas while strengthening rabies education and dog bite surveillance activities across the hills.

The adoption programme continued successfully with Blacky (Male) and Karuvi finding permanent homes. Foster care continued for Sweety, Janu, Kayal, Blacky (Female) at the KSPCA Foster Home, while several other rescued animals remained under the care of dedicated foster families.

Volunteer Engagement

Kodaikanal International School (KIS) – CAS Project

As part of the Creativity, Activity and Service (CAS) programme, students from Kodaikanal International School (KIS) volunteered at the KSPCA Centre during February. The students spent time painting and beautifying sections of the shelter, helping to improve the environment for the animals in KSPCA's care.

Their enthusiastic participation and commitment to community service made a valuable contribution to the shelter, while also promoting compassion, animal welfare and responsible citizenship among young volunteers.

Rescue & Incident Reports

1. Injured Puppy Rescue – Srinivasapuram 1st Street

* Location: Srinivasapuram 1st Street

* Condition: Injured puppy

* Action: Rescued and brought to KSPCA for veterinary treatment and supportive care.

2. Dog Bite Investigation – Attuvampatty

* Location: Attuvampatty

* Incident: Owned dog bite case reported.

* Action: Bite investigation conducted. The owner was educated regarding the mandatory 10-day observation protocol, vaccination status and responsible pet ownership. Follow-up surveillance was carried out.

3. Public Complaint – Lake Area

* Location: Lake Area

* Incident: Complaint regarding a black-and-tan free-roaming dog.

* Action: KSPCA field team investigated the complaint, assessed the animal's condition and behaviour, and provided guidance to the complainants. The dog was friendly and already neutered and vaccinated in September 2025.

4. Injured dog rescue – Turnerpuram

Location – turnerpuram

Incident – complaint of accident hit dog

Action- dog brought to centre for treatment and care

Anti-Rabies Vaccination Drive

Pamparpuram & Surrounding Areas – 20 February 2026

Adoption & Foster Care Summary

Adopted

* Blacky (Male) , Karuvi and black and white pup male was adopted

Foster Care

The following continued under KSPCA foster care during February:

* Sweety

* Janu

* Kayal

* Blacky (Female)

Several additional rescued animals also remained under the care of KSPCA's foster network while awaiting permanent adoption.

Animal Welfare & Cruelty Intervention

During the first week of February 2026, the Tamil Nadu Animal Welfare Board (TNAWB) received a complaint regarding six pet dogs being kept under poor welfare conditions in the Kalkuli area. The animals—three German Shepherds, two Shih Tzus, and one Pomeranian—were reportedly tethered in a confined space without adequate access to food or drinking water.

The Kodaikanal Society for Protection & Care for Animals (KSPCA) team conducted an initial inspection and advised the owners to immediately improve the living conditions and ensure proper care for the animals.

As the welfare concerns remained unresolved, a joint inspection was carried out on 16 February 2026 by TNAWB Animal Welfare Officer Dr. Vasudevan, veterinarians from the Animal Husbandry Department, and the KSPCA team. The owners were formally warned and instructed to comply with animal welfare standards.

Follow-up visits over the subsequent days confirmed that the dogs' living conditions had significantly improved, with adequate food, water, shelter, and overall care being provided. The intervention successfully ensured the welfare of all six dogs without the need for further legal action.

Working Equine Health & Welfare Camp March 24th to March 27th

The Working Equine Health & Welfare Camp was jointly organised by WVS Ooty and the Kodaikanal Society for Protection & Care for Animals (KSPCA) in collaboration with the Kodaikanal Municipality, Dindigul District Administration, Kodaikanal Wildlife Sanctuary, Palani Municipal Corporation, and the Animal Husbandry Department.

The camp was conducted from 24–26 March 2026 across working equine areas in Kodaikanal, followed by an outreach programme in the Palani region on 27 March 2026.

The camp provided comprehensive veterinary healthcare services to working horses and ponies used for tourism and agriculture, focusing on preventive healthcare, emergency treatment, owner education and improving equine welfare.

Equine Vaccination & Deworming

A four-day Working Equine Health & Welfare Camp was conducted by WVS Ooty and KSPCA in collaboration with the Kodaikanal Municipality, Dindigul District Administration, Kodaikanal Wildlife Sanctuary, Palani Municipal Corporation, and the Animal Husbandry Department from 24–27 March 2026.

A total of 122 working horses and ponies across the Kodaikanal Hills were vaccinated against Tetanus and dewormed with 1% oral ivermectin suspension. On 27 March 2026, a further 47 working equines were vaccinated in Palani Bus Stand and surrounding areas, bringing the overall total to 169 equines vaccinated.

Working ponies returning from work in ***Poondi and Kilavarai, Kodaikanal****. These ponies carry hill garlic from farms to the town markets.*

Vaccination Coverage

24 March 2026

Lake Side – 23 equines

Golf Club – 5 equines

Pine Forest – 4 equines

Pamparpuram – 2 equines

Total: 34 equines

25 March 2026

Poombarai – 23 equines

Mannavanur – 15 equines

Poondi – 19 equines

Kilavarai (ATR) – 20 equines

Total: 77 equines

26 March 2026

Pannaikadu – 5 equines

Machur – 6 equines

Total: 11 equines

Grand Total – Kodaikanal Hills: 122 equines

27 March 2026

Palani Bus Stand and surrounding areas – 47 equines

Overall Total Vaccinated: 169 working equines

Major Veterinary Cases Attended

* Surgical removal of excessive granulation tissue from a horse that developed complications following castration, with successful recovery.

* Treatment of a senior rescued horse with a large pectoral haematoma caused by trauma.

* Treatment and follow-up care for a pony with a barbed-wire injury.

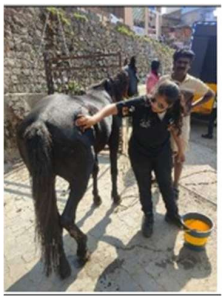

* Dental floating performed on tourist riding horses to correct sharp enamel points.

* Hoof trimming carried out for horses with overgrown hooves.

* Treatment of two horses that sustained injuries following separate bison attacks.

Owner Education & Awareness

Interactive awareness sessions were conducted for horse and pony owners on:

* Glanders awareness and current government regulations.

* Biosecurity and disease prevention.

* Nutrition and the importance of quality forage.

* Dental and hoof care.

* Responsible ownership and welfare of working equines.

The collaborative initiative strengthened partnerships between government departments and animal welfare organizations while improving the health, welfare and preventive healthcare of working equines across the Kodaikanal Hills and the Palani region.

Tourist riding horses and their owners from ***Kodaikanal town****.*

Working ponies and their owners from ***Poombarai, Kodaikanal****.*

A horse with a bison attack injury was attended. The incident had happened a month ago but the wound had not healed completely. Upon examination, a purulent exudate was found oozing. The wound was flushed and cleaned. A course of systemic antibiotics and anti-inflammatory were initiated.

Foster Care & Adoption Update

During March 2026, the German Shepherddog named " puppy" that had been rescued in November was returned to the KSPCA Centre by its adoptive family, who were no longer able to care for the dog due to personal circumstances.

Puppy was welcomed back into KSPCA's foster care, where she continues to receive proper nutrition, veterinary care, and socialisation. Efforts are ongoing to find a responsible and loving forever home that can provide the long-term care and commitment the dog deserves.

Along with her all others remain in KSPCA foster care. Total 7 in KSPCA

6 kittens were rescued by Dr Ramana and one lost kitten was reunited with its owner.

ADOPTION:

Blacky female was adopted and more got adopted from foster homes.

Remarks: KSPCA maintains active rabies surveillance by recording all reported bite cases, monitoring suspected animals, and submitting brain samples from suspected rabies cases to NIMHANS for confirmatory diagnosis. This systematic approach has strengthened disease surveillance, enabled timely public health interventions, and contributed to improved rabies control in the Kodaikanal Hills.

KSPCA AGM Minutes

Date: October 29, 2025

Time: 11:00 AM

Mode: Zoom

Meeting Link: https://zoom.us/j/85729461382 (placeholder for records)

Members Present:

* Janani Krishnamurthy

* Ravi Kumar

* Ramji Srinivasan

* Ranjini Deepak

* Deepak

* Sukanya

* Shailaja

* Lakshmi Chand

* Bala

* Azhar

Meeting Minutes

1. Welcome Note

* Janani Krishnamurthy, Founder & Managing Trustee of KSPCA, welcomed all members and thanked them for their continued support.

* A brief overview of KSPCA's activities during the financial year 2025–2026 was presented, highlighting rescue efforts, medical care, ABC and ARV programmes, adoption initiatives, wildlife interventions, equine welfare camps, and community awareness programmes.

2. Annual Report and Financial Overview (2025–2026)

* Ravi Kumar presented the Annual Report along with the financial overview for the year 2025–2026.

* Members discussed the increasing operational costs associated with rescue cases, medical treatment, infrastructure maintenance and field activities.

* It was unanimously agreed that long-term financial sustainability would be the primary focus for the coming year.

3. Adoptions and Foster Care

* The committee reviewed the year's adoption and foster programme.

* Successful adoptions from KSPCA foster homes were appreciated.

* It was noted that several senior, disabled and special-needs animals would continue to remain under permanent care at the KSPCA shelter.

4. Rescue Operations and Emergency Care

* Members reviewed the increasing number of emergency rescue cases attended throughout the year.

* Appreciation was expressed to the veterinary team, handlers and volunteers for responding to emergencies across the Kodaikanal hills.

* The need for additional manpower to manage growing rescue numbers was discussed.

5. Ongoing and Upcoming Projects

Janani Krishnamurthy presented an overview of ongoing and proposed projects:

Centre Expansion

* Due to increasing animal admissions, the present facility is becoming overcrowded.

* Expansion of kennels, isolation units, treatment areas and staff accommodation was discussed.

* Members agreed that expanding the centre will remain a priority during the coming year.

Veterinary Team Strengthening

* KSPCA will recruit:

  * One Senior Veterinary Surgeon.

  * One Junior Veterinary Surgeon.

  * Additional Animal Handlers.

  * Supporting staff for daily animal care and field operations.

Mission Rabies Programme

* Members reviewed the continued collaboration with Mission Rabies India.

* Rabies surveillance, vaccination drives and bite case documentation will continue throughout the year.

* Public awareness and educational programmes will be expanded.

Equine Welfare Programme

* KSPCA will continue conducting two Equine Welfare Camps annually.

* The next scheduled camp and outreach activities were briefly discussed.

6. Fundraising and Financial Sustainability

* The major agenda of the AGM focused on fundraising.

* Members discussed the increasing expenses related to:

  * Veterinary medicines and consumables.

  * Animal food and nutrition.

  * Staff salaries.

  * Veterinary salaries.

  * Fuel and rescue vehicle maintenance.

  * Shelter maintenance and repairs.

  * Expansion of infrastructure.

* Various fundraising strategies including CSR partnerships, grants, donor engagement, sponsorships and online campaigns were discussed.

* Members agreed that strengthening financial resources is essential to sustain KSPCA's growing activities.

7. Facility Development

* Updates regarding the proposed shelter expansion were reviewed.

* Members discussed additional kennel construction and improving treatment facilities.

* Work towards infrastructure development will continue based on available funding.

8. Staffing and Committee Decisions

* The committee discussed strengthening the organisational structure to meet increasing workload.

* Janani Krishnamurthy proposed appointing Ms. Naveena as KSPCA Cruelty Officer.

* The proposal was seconded by Ramji Srinivasan.

* The resolution was unanimously approved by all members present.

9. Registration, Documentation and Compliance

* Members reviewed ongoing documentation, statutory compliance and organisational records.

* Continued efforts towards strengthening governance, record keeping and reporting systems were discussed.

10. Animal Welfare Initiatives

* Members discussed continued efforts to address illegal breeding, responsible pet ownership and pet registration awareness.

* Community outreach and educational programmes will continue in coordination with local authorities whenever possible.

11. Other Matters

* Volunteer engagement programmes will continue.

* Greater community participation in rescue, adoption and awareness activities was encouraged.

* Members appreciated the dedication of KSPCA staff, veterinarians, volunteers and supporters throughout the year.

12. Thank You Note

* Janani Krishnamurthy thanked all trustees, committee members, veterinarians, staff, volunteers and supporters for their commitment towards animal welfare.

* Ravi Kumar concluded the meeting by reaffirming KSPCA's mission to continue providing quality veterinary care, rescue services and humane animal welfare programmes throughout the Kodaikanal hills.

DOG BITE & RABIES SURVEILLANCE SUMMARY (2025–2026)

Total Bite & Rabies Surveillance Cases Attended	:	55
Samples Tested at NIMHANS	:	55
Rabies Positive Cases	:	10
Rabies Negative Cases	:	45

REMARKS:
All reported bite cases were promptly investigated and monitored by the KSPCA Surveillance Team. Suspected rabies cases were observed, brain samples collected where required, and submitted to NIMHANS for confirmatory diagnosis. Follow-up included community education, post-exposure prophylaxis (PEP) guidance, ring vaccination where necessary, and continued surveillance to prevent further transmission.

"Every life we touch, every treatment we provide, every rescue we make and every act of compassion brings us closer to a kinder and safer world for animals."

Together, we make a difference.
